## NATIONAL SAVINGS

## CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the National Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

**TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT**

Births and deaths from principal diseases in towns with a population of over 30,000 in the Provinces of India and some of the Indian States for the week ending the 13th August, 1949

## REMARKS

The figures of births and deaths shown in this statement for the week ending the 13th August 1949, relate to 170 towns with an estimated population of 22,429 thousands. The total number of towns is 213 and their population is 25,943 thousands. Thus 79% of the total number of towns representing 86% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 14,133 and 8,891 representing birth and death rates of 32.8 and 20.6 per thousand of population respectively.

(A) *Indian Provinces*.—The data here relate to 158 towns with an estimated population of 20,786 thousands. Information from Bihar & Assam could not be included. The total number of towns is 189 and their population is 23,320 thousands. Thus 83% of the total number of towns representing 89% of the total population is covered. The numbers of births and deaths recorded in these towns were 13,317 and 8,379 representing birth and death rates of 33.3

and 21.0 per thousand of population respectively. The table at the end gives the position by provinces.

The towns of Guddiyattam in Madras; Etawah in U.P. and Khandwa in C.P. recorded high death rates of 57.3, 51.1 and 50.8 per thousand of population respectively. There was a considerable number of cholera deaths in Guddiyattam. In Etawah, deaths from cholera and fevers were considerably high. In Khandwa, the high death rate was largely due to deaths from fevers.

(B) *Unions and States*.—The data here relate to 14 towns with an estimated population of 1,643 thousands. The total number of towns is 24 and their population is 2,623 thousands. Thus 58% of the total number of towns representing 63% of the total population is covered. The numbers of births and deaths recorded in these towns were 816 and 512 (birth in Trichur excluded) representing birth and death rates of 26.8 and 16.2 per thousand of the population respectively. None of the towns recorded a death rate of 50 or over per thousand.
